PAT 463/563 (Fall 2025)

# Music & AI

## Lecture 18: Discussions, Challenges & Opportunities

Instructor: Hao-Wen Dong

UNIVERSITY OF MICHIGAN

# 🚀 Project: Presentation & Report

- **Presentation** in class on **Dec 1**
  - **10-min** presentation that summarizes your motivations, methods, results, analysis and discussions
  - You may follow any structure that best suits your narrative
- **Report** due at **11:59pm ET** on **Dec 15**
  - A **2 to 3-page** (excluding references) report that summarizes your motivations, methods, results, analysis and discussions
  - You may use any template
- **No late submissions!** Submit your work early and update it later.

# 🚀 Project: Rubrics

- **Presentation** (**20pt**)
  - Attendance (10pt)
  - Clarity (5pt)
  - Organization & presentation (5pt)
- **Report** (**20pt**)
  - Writing clarity (5pt)
  - Organization & presentation (5pt)
  - Results (5pt)
  - Discussion (5pt)

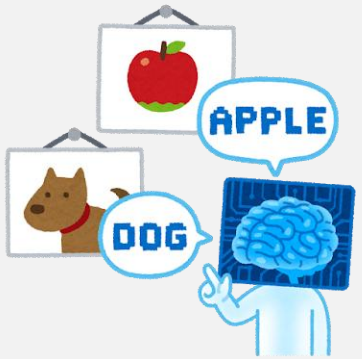
# Course Evaluation

- Your feedback is highly appreciated!
- Enter at umich.bluera.com/umich

# What is AI?

# What is Artificial Intelligence?

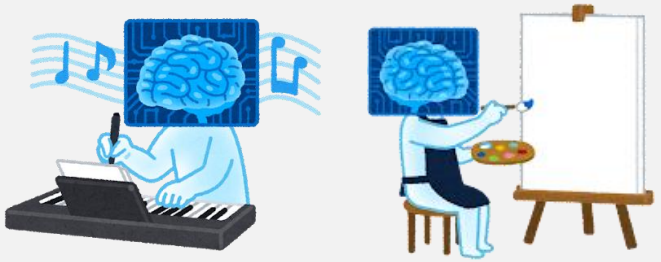
**Systems that think like humans**



**Systems that think rationally**

**Systems that act like humans**

**Systems that act rationally**



# 🤔 What is your expectation of a Real AI?

- **Thinking vs Acting**
  - An AI **needs to know how to think**
  - An AI **doesn't need to know how to think**

- **Human vs AI**
  - An AI **needs to behave like a human**
  - An AI **doesn't need to behave like a human**

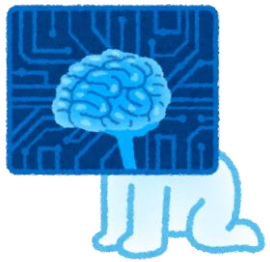
# 🤔 What is your expectation of a Real AI?

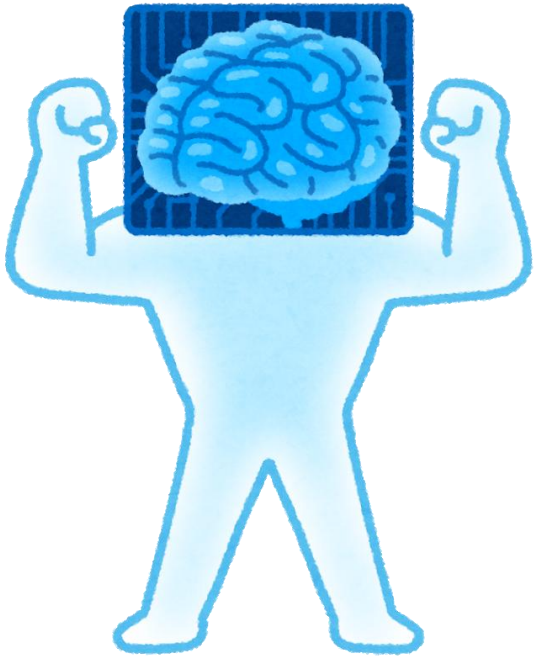
- **Thinking vs Acting**
  - An AI **needs to know how to think** **(Votes: 0)**
  - An AI **doesn't need to know how to think** **(Votes: 3)**

- **Human vs AI**
  - An AI **needs to behave like a human** **(Votes: 0)**
  - An AI **doesn't need to behave like a human** **(Votes: 3)**

# 🤔 Is current music AI more capable than you thought?

- **Yes** or **No**?
- **Yes**, in what aspects?
- **No**, in what aspects?





# 🤔 Discussions

- **To what extent of human involvements** can a song still be called AI music?
- **Shall we intervene** if AI-generated material doesn't sound polished?
- What is the **goal of AI music**?

> "Whatever you now find weird, ugly, uncomfortable and nasty about a new medium will surely **become its signature**."
>
> – Brian Eno, 1996

# Copyright

# Purpose of Copyright

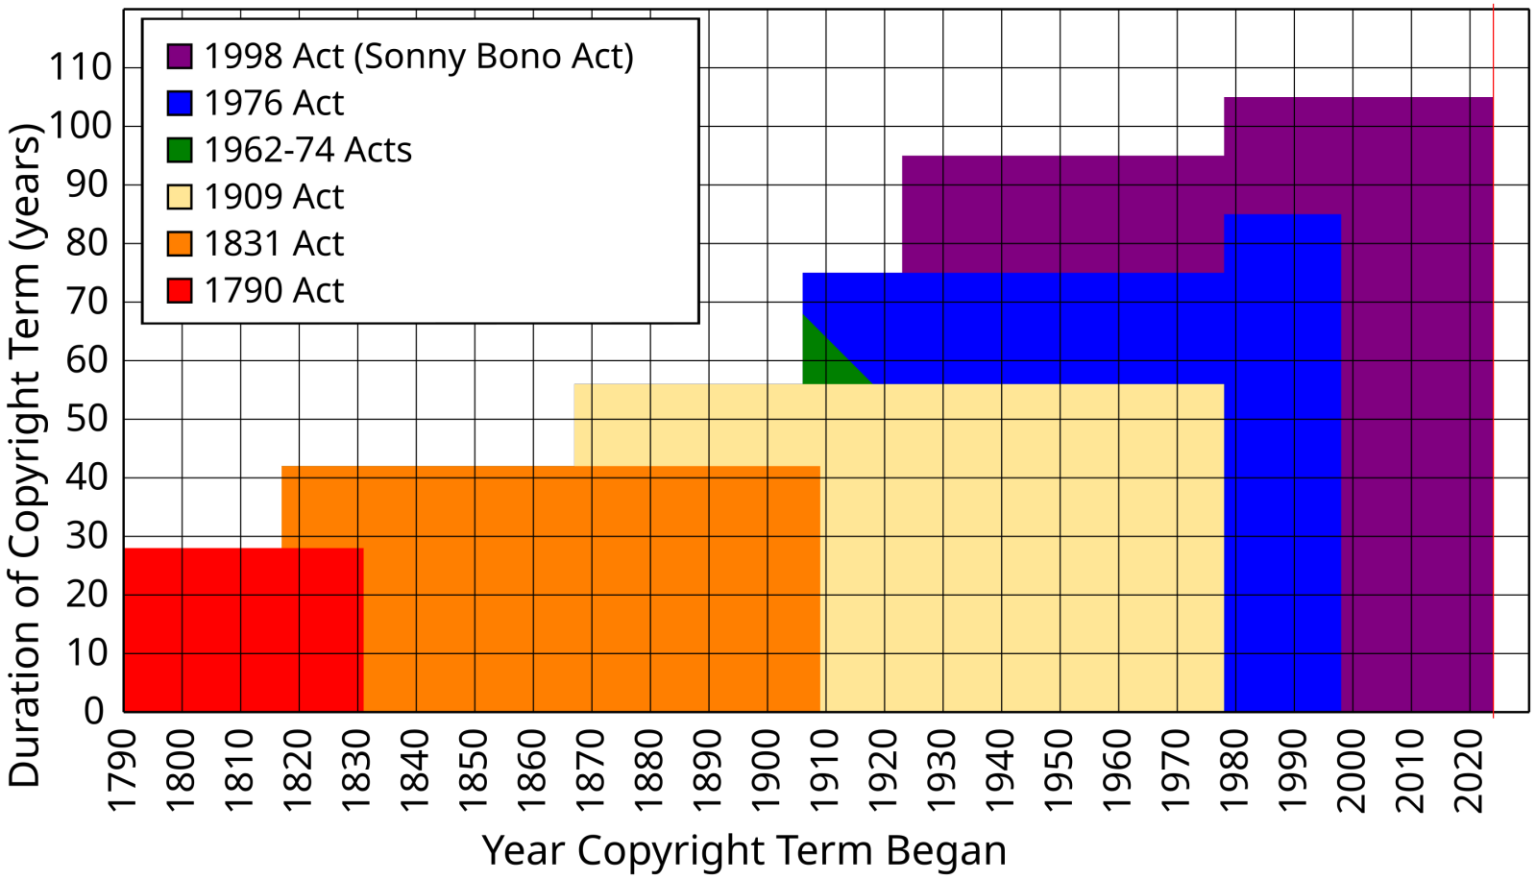
- According to Copyright Alliance:
  - "The primary purpose of copyright is to **induce and reward authors**, through the provision of property rights, to create new works and to make those works available to the public to enjoy."
  - "The theory is that by granting certain exclusive rights to creators that allow these creators to protect their creative works against theft, **creators receive the benefit of economic rewards** and **the public receives the benefit of the creative works** that might not otherwise be created or disseminated."

copyrightalliance.org/education/copyright-law-explained/copyright-basics/purpose-of-copyright/

# Paul McCartney on AI & Copyright

youtu.be/DpebXMTlYNo

# Expansion of Copyright Law



(Source: Tom Bell via Wikimedia Commons)

# 🤔 Purpose of Copyright

- What about **meme culture**?
- Think about **portrait vs photography**
  - While photography displace realistic portraits, it also **frees portrait painting into new art forms** like impressionism and abstract arts
  - Will AI music **raise the collective standards of music** for the public?

# Fairly Trained: L Certification

- All of the **training data used for the model(s)** being certified must fall into one of the following categories:
  - Be **explicitly provided to the model developer for the purposes of being used as training data**, according to a contractual agreement with a party that has the rights required to enter such an agreement
  - Be available under an **open license** appropriate to the use-case
  - Be in the **public domain globally**
  - Be **fully owned by the model developer**

**Fairly Trained Certified**

fairlytrained.org

# Fairly Trained Certified Companies

fairlytrained.org/certified-models

# Fairly Trained Certified Products & Models

fairlytrained.org/certified-models

# 🤔 Music Gen AI & Copyright

- How does AI-generated music compare to other industry-disrupting technologies like **recording** and **music sampling**?
- Does model training justify **fair use**?
- Is a music Gen AI model **a derivative of its training dataset**?
- Can a music Gen AI model **reproduce a song** in its training dataset?

# The Many Lawsuits about Generative AI

The New York Times

**The Times Sues OpenAI and Microsoft Over A.I. Use of Copyrighted Work (Published 2023)**

The New York Times sued OpenAI and Microsoft for copyright infringement on Wednesday, opening a new front in the increasingly intense legal battle.

# Reading: How Will the Law Handle Generative AI?

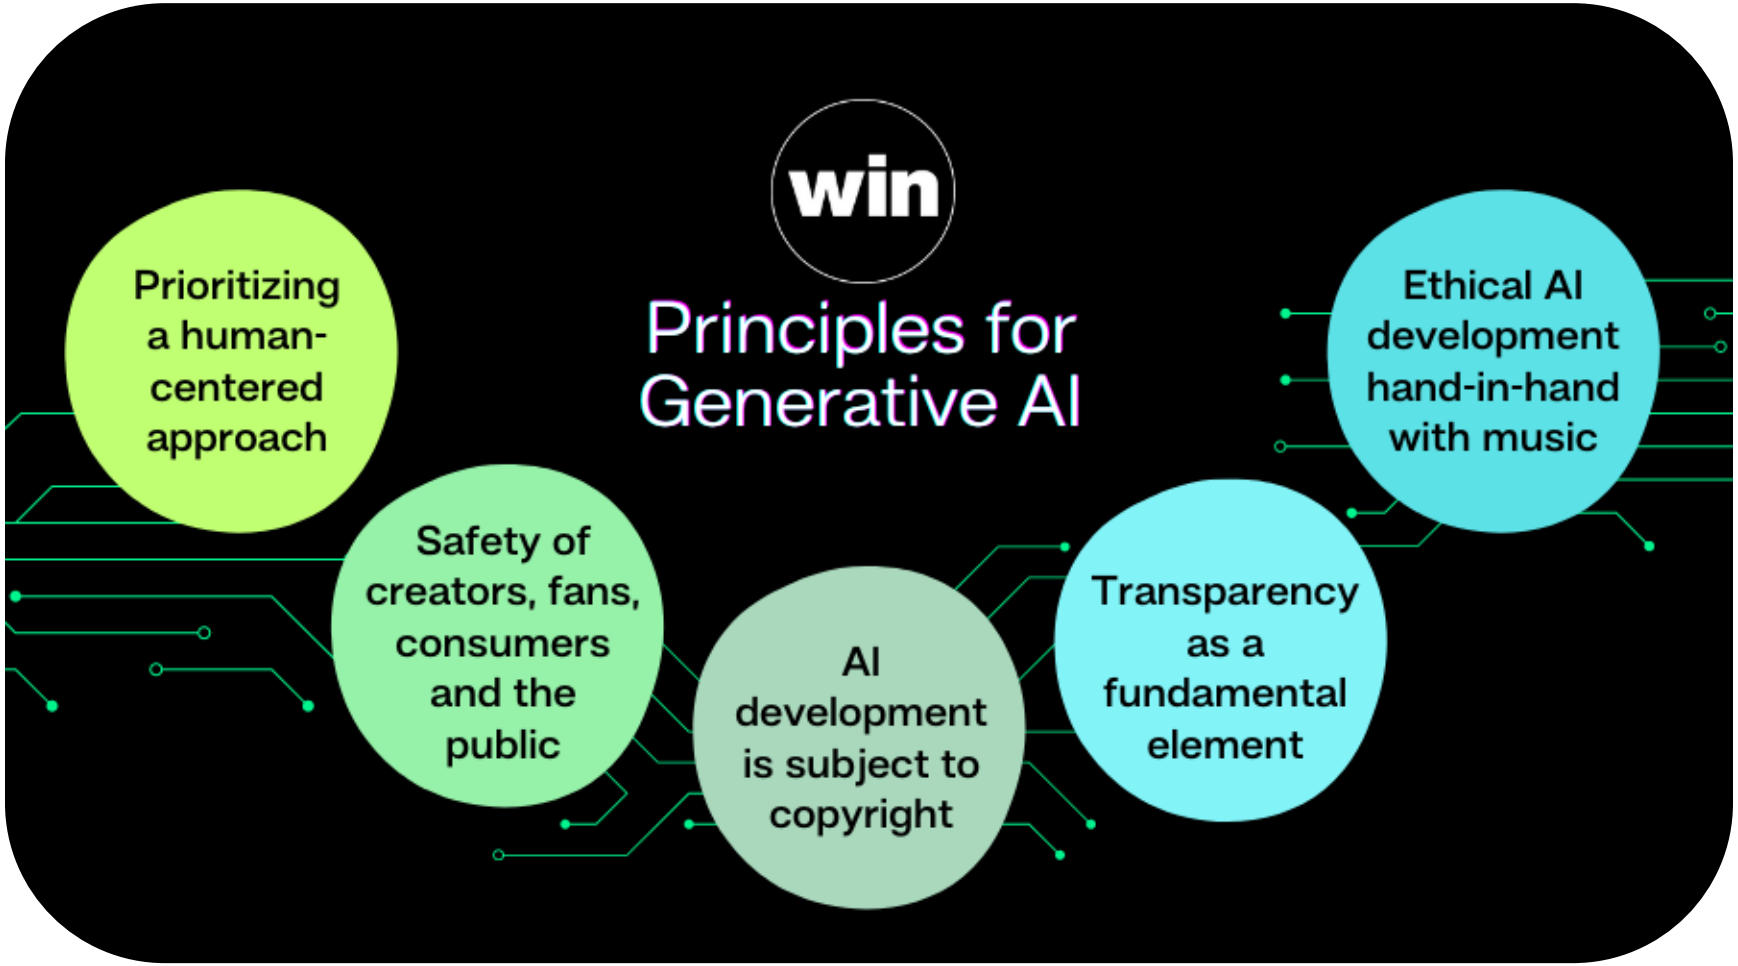
youtu.be/VxJXPWFoYoc

# Ethical Considerations

# Ethics vs Laws

> Ethics is doing **more than the law requires** and **less than the law allows**.
>
> – Michael Josephson

# Principles for Generative AI (Worldwide Independent Network)



winformusic.org/ai-principles/

# Ethical Implications of Music GenAI (Barnett, 2023)

- **Loss of agency and authorship**
- **Creativity stifling**
  - The repetitive nature of the music generation and that by limiting the creative output to possibilities of the model may result in a similar bound on human creativity
- **Predominance of western bias**
- **Copyright infringement**
- **Cultural appropriation**
  - Generative models make it easier to use content from marginalized cultures without any accompanying investment in or engagement from the community

Julia Barnett, "The Ethical Implications of Generative Audio Models: A Systematic Literature Review," *AIES*, 2023.

# Ethical Implications of Speech GenAI (Barnett, 2023)

- **Phishing and fraud**
- **Misinformation and deepfakes**
- **Security and privacy**
  - The potential for risk to security and privacy of individuals as a result of speech generative models, especially when they only require small segments of training data to produce a realistic voice of a targeted speaker
- **Non-consensual use of biometric data**

Julia Barnett, "The Ethical Implications of Generative Audio Models: A Systematic Literature Review," *AIES*, 2023.

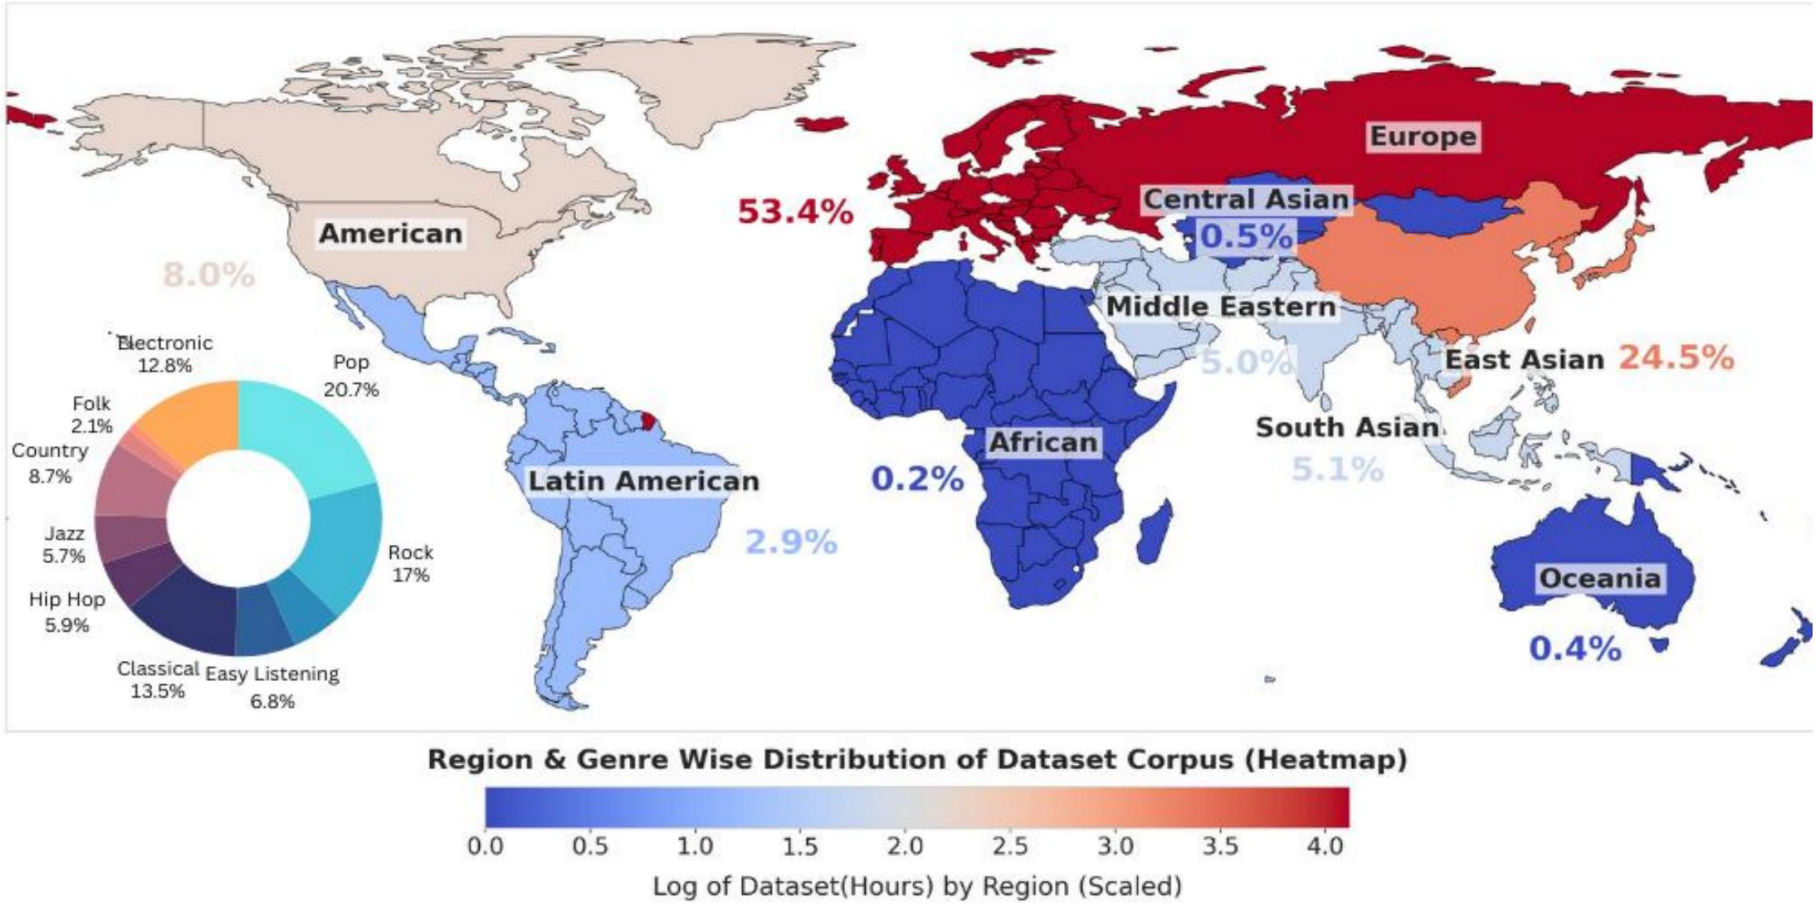
# Cultural Concerns

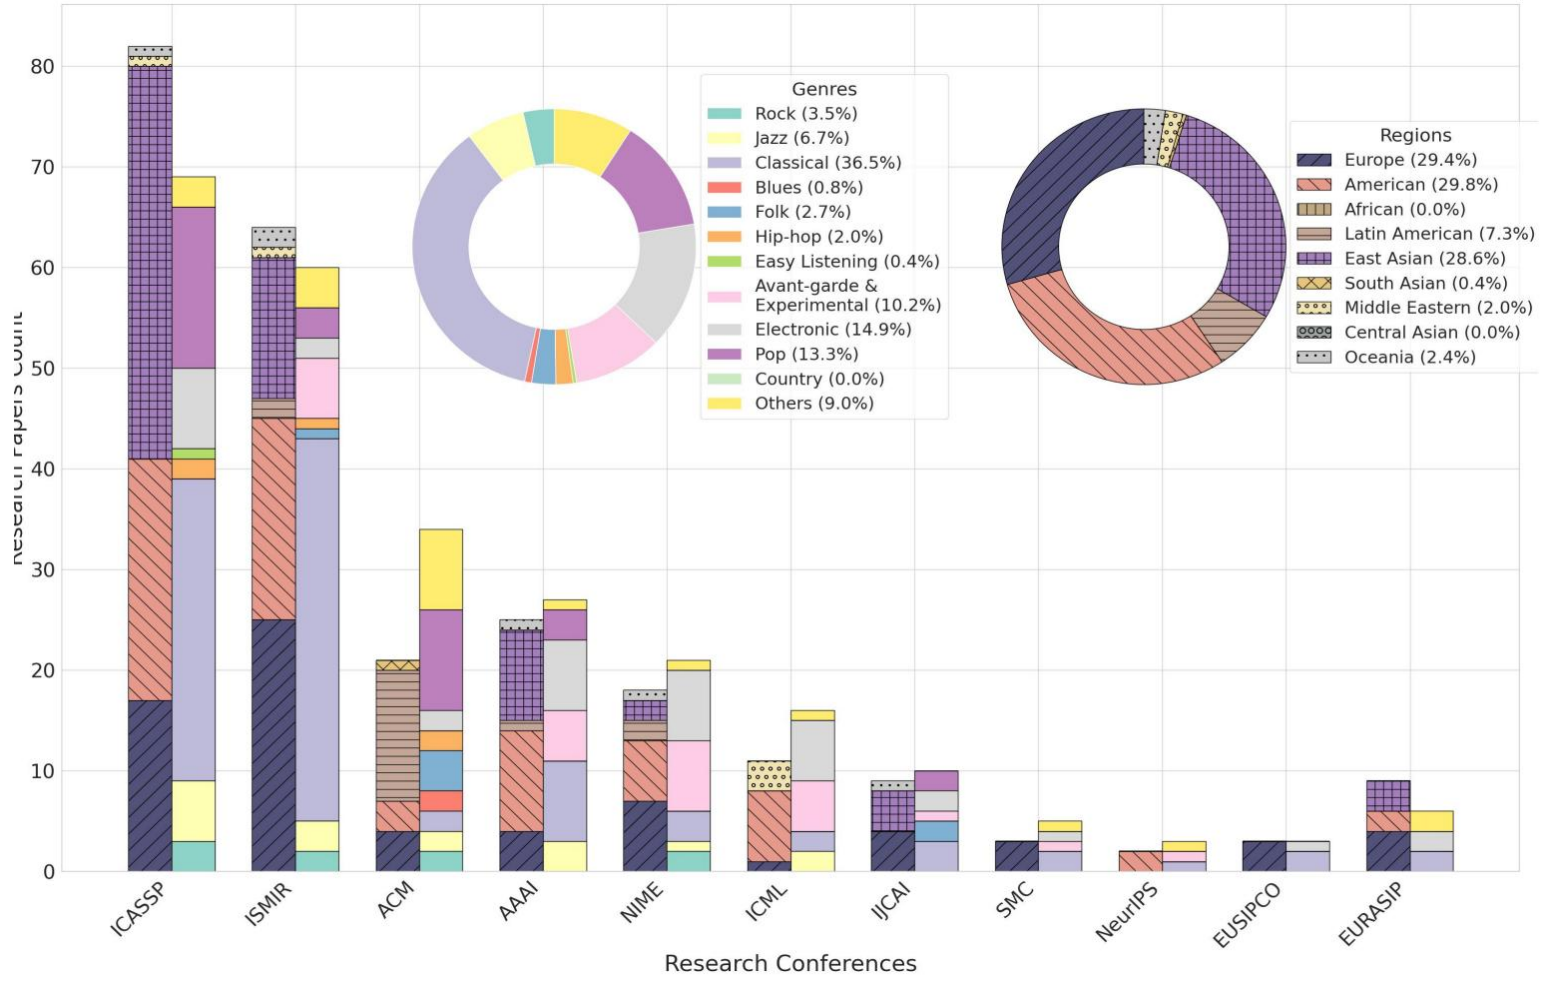
# Global Divide in AI Music Datasets (Mehta et al., 2024)



(Source: Mehta et al., 2024)

Atharva Mehta, Shivam Chauhan, and Monojit Choudhury, "Missing Melodies: AI Music Generation and its "Nearly" Complete Omission of the Global South," *arXiv preprint arXiv:2412.04100*, 2024.

# Global Divide in AI Music Research (Mehta et al., 2024)



(Source: Mehta et al., 2024)

Atharva Mehta, Shivam Chauhan, and Monojit Choudhury, "Missing Melodies: AI Music Generation and its "Nearly" Complete Omission of the Global South," *arXiv preprint arXiv:2412.04100*, 2024.

# Implications

- **Limiting Global South creativity**
  - Limits the potential for Global South music genres to evolve and adapt in the digital age
- **Economic disparities**
  - Worsens the economic disparities within the music industry
- **Reinforcement of existing biases**
  - Reinforces existing cultural biases, perpetuating a cycle where Global South music is viewed as less important or less valuable
- **Cultural erosion**
  - Genres such as Hindustani folk and traditional Arabic Maqam that represent centuries-old traditions, philosophies, and artistic expressions could fade from the public mind

Atharva Mehta, Shivam Chauhan, and Monojit Choudhury, “Missing Melodies: AI Music Generation and its "Nearly" Complete Omission of the Global South,” *arXiv preprint arXiv:2412.04100*, 2024.

# Recommendations (Mehta et al., 2024)

- **Explicit mention** of genres and model limitations
- **Avoid generation** when uncertainty exists
- Investing on **inclusive datasets**
- **Transfer learning** for underrepresented styles
- **Inclusive evaluation**

Atharva Mehta, Shivam Chauhan, and Monojit Choudhury, “Missing Melodies: AI Music Generation and its "Nearly" Complete Omission of the Global South,” *arXiv preprint arXiv:2412.04100*, 2024.

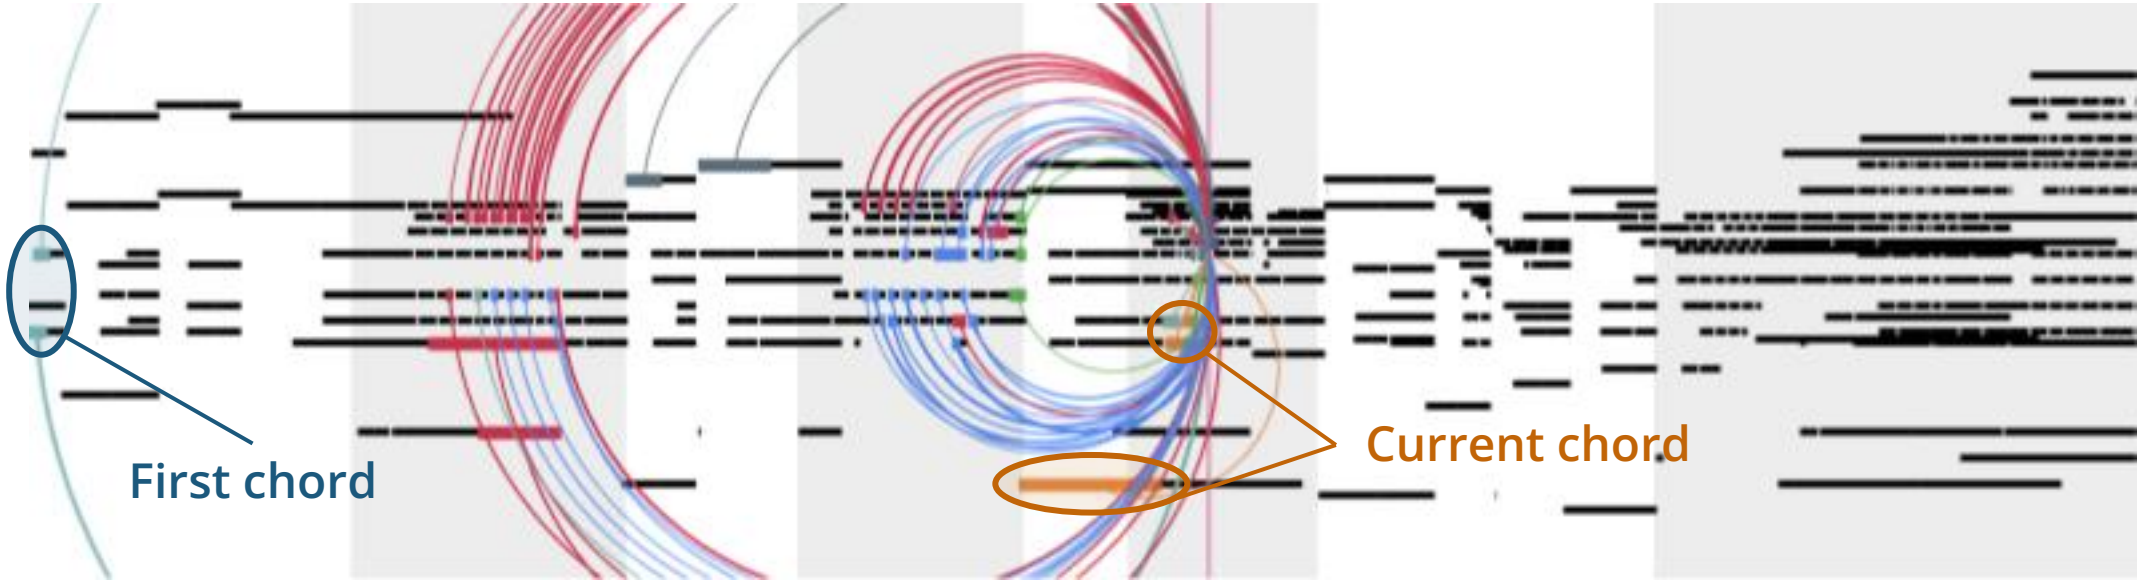
# Visualizing Musical Self-attention (Huang et al., 2018)

(Each color represents an attention head)



(Source: Huang et al., 2018)

Cheng-Zhi Anna Huang, Ashish Vaswani, Jakob Uszkoreit, Noam Shazeer, Ian Simon, Curtis Hawthorne, Andrew M. Dai, Matthew D. Hoffman, Monica Dinculescu, and Douglas Eck, "Music Transformer: Generating Music with Long-Term Structure," *ICLR*, 2019.
Cheng-Zhi Anna Huang, Ashish Vaswani, Jakob Uszkoreit, Noam Shazeer, Ian Simon, Curtis Hawthorne, Andrew M. Dai, Matthew D. Hoffman, Monica Dinculescu, and Douglas Eck, "Music Transformer: Generating Music with Long-Term Structure," *Magenta Blog*, December 13, 2018.

# Analyzing Musical Self-attention (Dong et al., 2023)

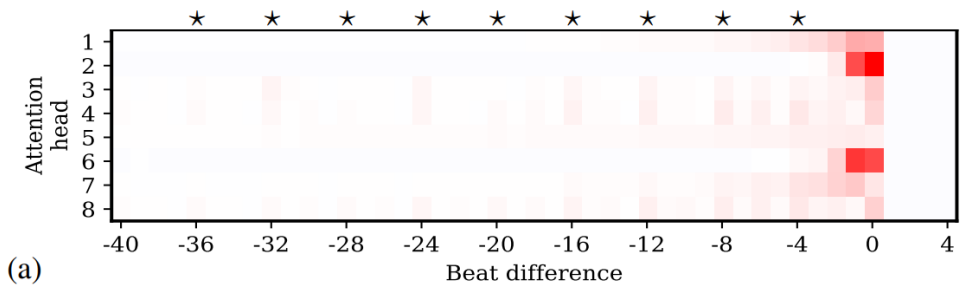
- We proposed two new quantities for measuring **mean relative attention**

$$\gamma_k^{(d)} = \frac{\sum_{\mathbf{x}\in\mathcal{D}} \sum_{s>t} a_{s,t}(\mathbf{x})\, \mathbb{1}_{x_t^{(d)} - x_s^{(d)} = k}}{\sum_{\mathbf{x}\in\mathcal{D}} \sum_{s>t} a_{s,t}(\mathbf{x})} \qquad \tilde{\gamma}_k^{(d)} = \gamma_k^{(d)} - \frac{\sum_{\mathbf{x}\in\mathcal{D}} \sum_{s>t} \mathbb{1}_{x_t^{(d)} - x_s^{(d)} = k}}{\sum_{\mathbf{x}\in\mathcal{D}} \sum_{s>t} 1}$$

- The MMT model attends more to notes

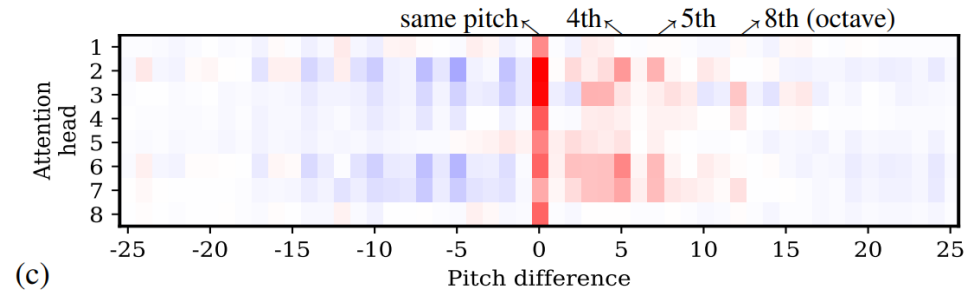
that are $4N$ beats away in the past

Positive and negative mean relative attention gain

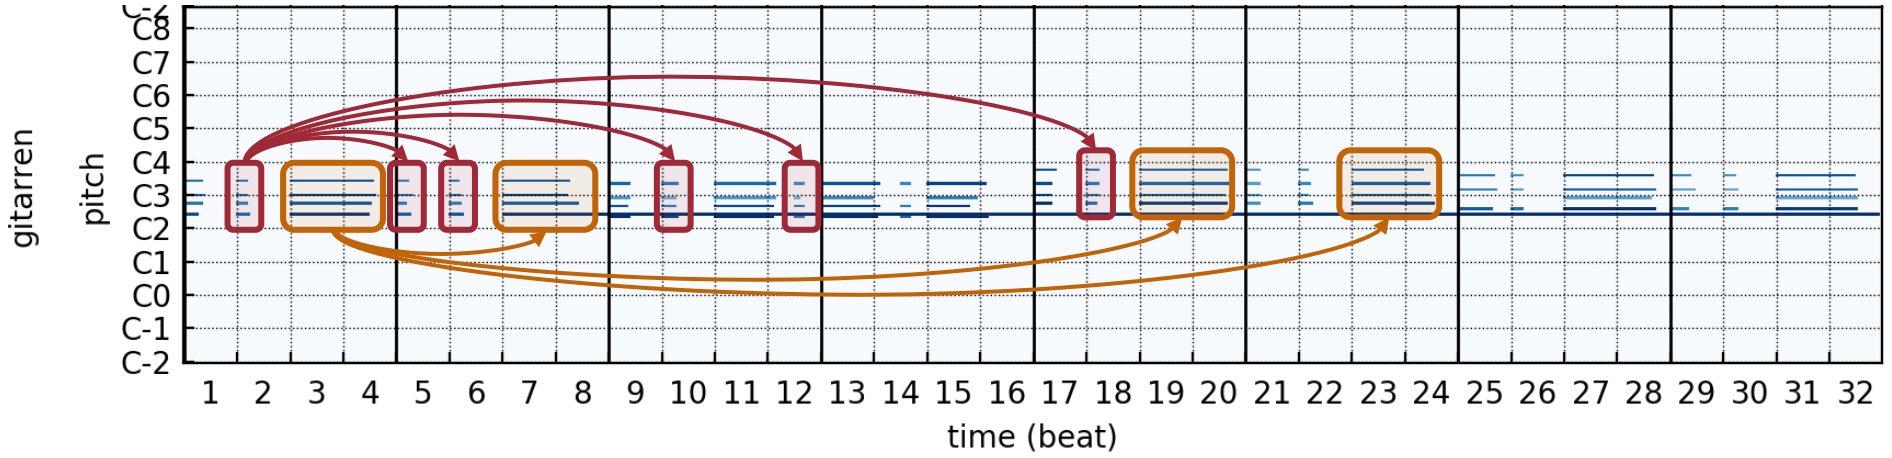


that has a pitch in an octave above which forms a consonant interval

Positive and negative mean relative attention gain



# Why Piano Rolls?



**Many musical patterns like melodies, chords, scales and arpeggios are translational invariant in the temporal and pitch axes**

Without **deviation from the norm**, progress is not possible.

– Frank Zappa

# Challenge 3: Usability

**How can AI music tools be integrated into an artist's creative workflow?**

# Challenge 4: Personalization

**How can we make “my personal AI music tools”?**

# YACHT & Google Magenta

"**The band first took all 82 songs from their back catalog** and isolated each part, from bass lines to vocal melodies to drum rhythms; they then took those isolated parts and broke them up into four-bar loops. Then, **they put those loops into the machine learning model**, which **put out new melodies based on their old work**. **They did a similar process with lyrics**, **using their old songs plus other material they considered inspiring**. The final task was to pick lyrics and melodies that made sense, and pair them together to make a song."

youtu.be/_yz8QYzcfxI

Manos Plitsis, Theodoros Kouzelis, Georgios Paraskevopoulos, Vassilis Katsouros, and Yannis Panagakis, "Investigating Personalization Methods in Text to Music Generation," *ICASSP*, 2024.

# Challenge 4: Personalization

**How can we make “my personal AI music tools”?**

# Challenge 5: Creativity

**Can AI ever be creative? How can AI augment human creativity?**

# The Curse of Machine Learning

- As the old saying goes, “**AI is only as good as the data it learns from**.”
- Machine learning models are trained to approximate some distribution in its formal formulation.
- This seems to contradict the idea of creativity that requires **the ability to extrapolate** and **think out of the box**.

- **Can AI ever be creative?**

# Creative Adversarial Network (Elgammal et al., 2017)

# What is Creativity?

> Creativity is the ability to come up with ideas or artefacts that are **new**, **surprising** and **valuable**.
>
> – Margaret Boden, 2007

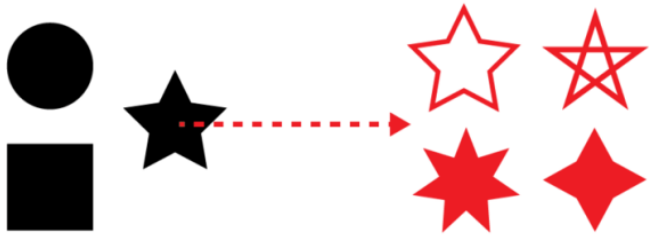
# Three Types of Creativity (Boden, 2007)

## Combinatorial Creativity

Combining existing ideas and things into something new

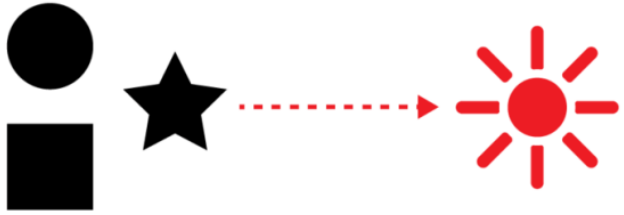
## Exploratory Creativity

Exploring possibilities within a domain



## Transformative Creativity

Radically new ideas that redefine domain and applicable rules



(Source: van Kuijk, 2023)

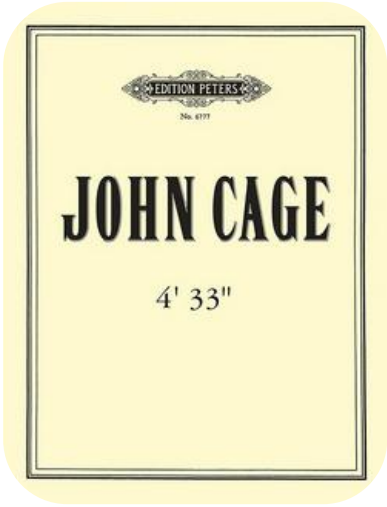
# Can AI learn Transformative Creativity?

**Duchamp & conceptual art**

**Picasso & cubism**

**Cage & modernist music**



**Schoenberg & atonality**

# John Cage's 4'33" (1952)

They missed the point. **There's no such thing as silence**. What they thought was silence, because they didn't know how to listen, was full of accidental sounds. You could hear the wind stirring outside during the first movement. During the second, raindrops began pattering the roof, and during the third the people themselves made all kinds of interesting sounds as they talked or walked out.

– John Cage, on the premiere of 4'33", 1952

# Creativity vs Art

**Creativity** is allowing yourself to **make mistakes**.
**Art** is knowing **which ones to keep**.

– Scott Adams

# Challenge 5: Creativity

**Can AI ever be creative? How can AI augment human creativity?**

# The Five ~~Challenges~~ Opportunities!

- **Representations**: How can we best represent music for machine learning?
- **Multimodality**: Can AI learn to create music by "listening to" music rather than "reading" music?
- **Usability**: How can AI music tools be integrated into an artist's creative workflow?
- **Personalization**: How can we make "my personal AI music tools"?
- **Creativity**: Can AI ever be creative? How can AI augment human creativity?

# Final Thoughts
